17 Google Cloud services, under $200 a month. The real cost is people.

What it costs to run EIOS as built. Illustrative: a mid-size APAC bank, 50,000 alerts a year, about 208 investigated cases a month.

THINK

Agents and models

- **Google ADK** — $0
  open source agent framework
- **Gemini on Vertex AI** — $13–58
  per token, 8 turns a case
- **Agent Search** — ≈ $1
  per query, about 2 a case
- **Model Armor** — not priced
  per screened turn

✓ One redraft, then fail closed. Rate limit per operator.

DATA

Stores, streams and graph

- **BigQuery** — < $1
  storage, 100 MB cap per query
- **BigQuery Graph** — ≤ $25
  Enterprise slots, baseline 0
- **Firestore** — < $1
  reads and writes per turn
- **Pub/Sub, Cloud Storage** — < $2
  per GiB

✓ An idle graph reservation costs nothing. 30 s query timeout.

TRUST

Identity, keys, secrets

- **Cloud KMS** — < $1
  one key, per signature
- **Secret Manager** — < $1
  per secret version
- **Identity Platform** — $0
  first 50,000 users free

✓ Requests expire in 15 min. The AI has no approve tool.

RUN

Runtime, deploy, observe

- **Cloud Run** — $23–93
  1 vCPU, 2 GiB, one warm instance
- **Artifact Registry, Cloud Build** — < $2
  per GiB, per build minute
- **Logging, Monitoring, Trace** — < $5
  above the free tier

✓ Budget alerts at 50, 80 and 100%. Images deploy by digest.

$40–190
a month, the whole stack
excluding Model Armor, not priced

$0.07–0.29
variable cost per case
Gemini is over 95% of it

3-YEAR COST, ABOUT $1.6M

Pays back at a 15–35% cut in review effort, measured next

Cloud 0.4%

Illustrative estimates. Prices: Google Cloud pricing pages and October 2026 web figures. Token counts, team size (6 for 24 weeks, then 3 FTE) and rates are assumptions. Review cost is a vendor range.
