
1
SIGNAL
Know what matters
Alerts ranked into a focused queue
Rings, geo risk and partner churn found by engines
Causal graph, forecast and what-if for executives
BigQuery Graph
scikit-learn
NetworkX
2
EVIDENCE
See the whole case, cited
One ontology over contract-checked data
Gemini briefs each role; every figure is checked against an engine
Regulation quoted by sentence number
Pub/Sub
Gemini on Vertex AI
Agent Search
DuckDB
3
DECISION
A person holds the key
AI proposes; no approve tool exists
A signed request that expires; a second person approves
Role-based access; PII tokenised before the model
Cloud KMS
Identity Platform
Secret Manager
4
RECORD
Prove it later
Hash-chained decision ledger
Evidence sealed with each approval
SLOs, red-line tests and a restore drill
Firestore
Cloud Storage
Cloud Trace
TRUST BY CONSTRUCTION
The model explains. It cannot approve, and it cannot show a figure no engine produced.
