Where the time went

One copilot turn, drawn to scale

Before

10.4 s

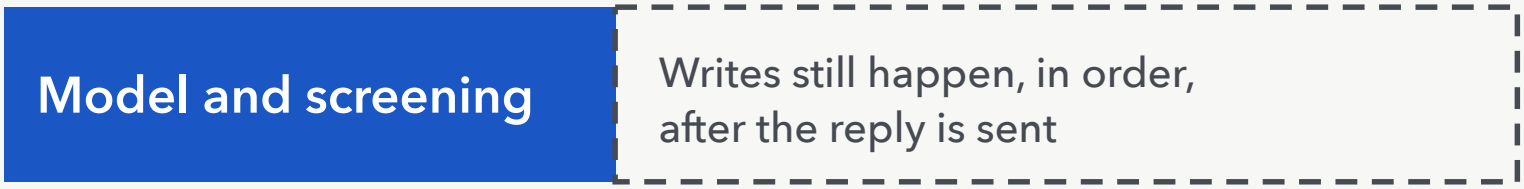

Armor 0.8 s

Firestore session writes 5.8 s
6 to 8 transactions, each awaited

After write-behind sessions

4.2 s

Answer returned

Now, over 246 live turns

2.7 s

A separate run, so drawn as an outline

Bars 1 and 2: medians from the same probe, a laptop in the Philippines calling us-central1. Write spans are drawn schematically.
Bar 3: the live evaluation of 18 October, a separate run.
