
WHO USES EIOS
People above and below, EIOS between
1 An alert fires
what starts it
2 EIOS builds the case
how EIOS helps
3 A person decides
what the human does
4 A second person approves
who else must agree
5 The proof is sealed
what is left behind
Investigator
AML analyst. Reviews the dossier, edits the draft, proposes the action.
Opens the top alert
Case CR84920 is first in the queue.
Reads one cited screen
Not five systems. Every number shows its source.
HUMAN DECISION
Reviews, edits, decides
Edits the report and asks to hold the withdrawals.
BLOCKED BY DESIGN
Cannot approve own hold
Two people are required: the proposer can't approve.
EIOS
The AI system on Google Cloud. It reads, assembles, drafts and proposes. It never approves, signs or files.
Pub/Sub
Every transaction is checked on arrival
Detection ranks every alert, riskiest first
TRIGGER
$8,000 deposited against $500 declared (16×), then 96% withdrawn
BigQuery Graph
Spots a ring: 23 accounts share a device and payment
Ignores a public gateway used by 142 strangers
Agent Search
Quotes the exact rule that applies
Vertex AI
Drafts the case summary and the report (SAR)
No number without proof: unverified drafts refused
Model Armor
Questions and answers are screened for abuse
The proposal is turned into a signed request
Cloud KMS
Digitally signed; expires in 15 minutes
The AI can only propose. It cannot approve or act.
The hold is carried out once; a receipt is kept
Firestore
Each approval is added to a record that can't be edited
The evidence is sealed so anyone can re-check it
Approver
Second officer. Authorises, never initiates.
Compliance head
Owns thresholds, signs off the SAR, verifies the ledger.
Sets what triggers alerts
The compliance head owns the alert thresholds.
HUMAN DECISION
Approves the hold
A second officer reviews the evidence and signs off. It expires if nobody acts.
Verifies and signs off
Checks the record is intact and signs off the report. Filing stays a human decision.
The AI proposes. People decide. The record remembers.
Google Cloud service
a person
EIOS
a human decision
hand-off
propose, sign, ledger
Case CR84920 is engine output on the seeded world; ids and figures are synthetic.
